Description of School

Very few other school programs focus on student success as does Berwyn East Academy (BEA), where that goal is to advance our students beyond expected grade level. The guiding principle at BEA is that every child can learn. So at BEA, we do not use any excuses that say that the child's shortcomings are the reason for lack of success. This is the primary way in which BEA is different than most school programs.

Mission

Mission Statement

To teach rules and techniques for effective expression and communication in the arts and science. To communicate, by these arts and sciences, our understanding of the univers and its role, and to instill a love of learning and discovery, justifying a life-long dedication to health, trith, and virtue.

Education

The BEA staff are confident that we can reach and teach every child. The programs for all core subjects are designed to address the individual needs of every student to include those who need extra time to master concepts, and for students to have the ability to move ahead quickly. We constantly measure the progress of every student, and we give extra attention to those students whose performance indicates a need. This attention to detail allows us to be successful with virtually every student in our school. That said, our program is designed to have every child MASTER every concept. Children who learn to mastery, learn faster, retain longer, and generally achieve higher. Consequently, we are able to advance most students beyond grade level in reading and math. Being ahead of grade level in the basic subjects is the best preparation for testing at the end of the year.
